DETAILED ACTION

Election/Restrictions

1. Claims 9-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 01 September 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Butler (3,014,723).

Regarding claim 1, Butler discloses first loop (2), having a first circular wall, the first wall having an inner and outer surface; a second loop (3) having a second circular wall, wherein said outer surface of said first and second loops are directly joined together (see figure 1).

Additionally:

4. Claims 1-5, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Stasiuk (3,115,340).

Regarding claim 1, Stasiuk discloses a first loop (9; identified with tag 1), having a first circular wall, the first wall having an inner and outer surface; a second loop (9; identified with tag 2) having a second circular wall, wherein said outer surface of said first and second loops are directly joined together (see figure 1). It is noted that the preamble, <u>a billiard rack for receiving</u>

Art Unit: 3711

<u>billiards balls</u> ..., does not limit the structure of the claimed device because the portion of the claim following the preamble is a self-contained description of the structure and does not depend on the preamble for completeness.

Regarding claim 2, Stasiuk shows said first and second loops (9) are the same size (see figure 1). Stasiuk shows that the loops can be any desired size (see column 2, line 26-29).

Regarding claim 3, Stasiuk shows the first and second loops can be any size. Therefore, the loops can be sized so that each loop can receive seven billiard balls.

Regarding claim 4, Stasiuk shows said first and second loops (9) are joined together with a bonding agent (the broadest reasonable interpretation of <u>bonding agent</u> would include welding seen at 15).

Regarding claim 5, Stasiuk shows said first and second loops (9) are made of rigid material (see column 3, lines 8-11).

Regarding claim 13, Stasiuk discloses a first loop (9; identified with tag 1), having a first circular wall, the first wall having an inner and outer surface; a second loop (9; identified with tag 2) having a second circular wall, a rigid plate (attaching portion 10 having arcuately bowed rigid strips 11 and 12) joining the first and second loops together (see figures 1, 2 and 4). It is noted that the preamble, a billiard rack for receiving billiards balls ..., does not limit the structure of the claimed device because the portion of the claim following the preamble is a self-contained description of the structure and does not depend on the preamble for completeness.

Regarding claim 14, Stasiuk further shows the loops are collapsible (see column 1, lines 25-32).

Art Unit: 3711

Response to Arguments

5. Applicant's arguments with respect to claims 1-5, 13 and 14 have been considered but are moot in view of the new ground(s) of rejection. The structural limitations of the claimed invention as presented read on Patents to Butler or Stasiuk. Both patents show 2 or more loops each having circular walls, wherein each wall has inner and outer surfaces. The loops are joined together either directly or via a plate. Both patents teach that the loops can be formed in any size. The loops irrespective of their size can accommodate 7 billiard balls. As indicated above the preamble, does not limit the structure of the claimed device because the portion of the claim following the preamble is a self-contained description of the structure and does not depend on the preamble for completeness.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
